

IVAN SHABANOV

Senior Software Engineer • Full-Stack & Web APIs • Relational Databases & SQL • React & Architecture

Yerevan, Armenia (GMT+4) • Local candidate (On-site / Hybrid in Yerevan)

ivan@ishbnv.dev • +374 77 719 518 • linkedin.com/in/ishbnv • github.com/ishbnv • ishbnv.dev

SUMMARY

Senior Software Engineer with 4+ years architecting and shipping user-facing web applications, scalable Web APIs, and high-load relational data services. Bridges end-to-end product delivery: designed and launched a credit-report product profitable in week one (+40% net profit, 6M-row dataset) leading a 3-engineer team, and built an automated drag-and-drop campaign canvas generating ~\$80K/month. Deep expertise in SQL and relational database performance profiling (cut 100K-row table latencies from 8 s to under 1 s), React, and AI-assisted engineering workflows. Based locally in Yerevan.

EXPERIENCE

Alfa-Dengi via GIDFINANCE — Senior Full-Stack Engineer • Tech Lead

Sep 2024 – Present • 2 yrs • Remote

Consumer-lending platform with 9K+ new leads a day. Cross-functional product team; contract engagement via GIDFINANCE.

- Launched a credit-report product that **turned profitable in its first week** (net profit +40%, EPC doubled from ~\$1.9 to ~\$3.8) by leading a 3-engineer team through technical design, user flows, Web API contracts, and backend querying a **6M-row** scoring dataset.
- Enabled marketers to launch automated multi-step campaigns **with zero engineering involvement** (~\$80K/month generated) by designing and building a visual drag-and-drop campaign canvas on React with live validation and normalized state.
- Cut query execution time on a 100K-row lead-scoring dataset (9K+ new leads/day) from **8 s to under 1 s** through deep database profiling, server-side pagination, and PostgreSQL query and index optimization.
- **Eliminated notification loss** under peak traffic bursts by moving notification delivery and domain-event processing to **Apache Kafka**, establishing fault-tolerant, replayable event streaming.
- Automated team delivery and DX: authored **project rules for Claude Code** (architecture conventions, guardrails) and built **custom MCP servers** exposing database schemas and documentation, cutting CRUD module delivery from ~2 h to ~40 min.

Appbooster — Full-Stack Engineer (contract)

Nov 2023 – Aug 2024 • 10 mos • Remote

Mobile-app marketing platform: ~100 employees, 10,000+ apps promoted for clients in 26 countries.

- Made **100% of payouts auditable** and screened out fraudulent completions by modeling the full task lifecycle behind an asynchronous moderation queue with anti-fraud rules, processing **hundreds of completions a day**.
- Scaled the task-and-rewards platform to **1,000 daily active users in 3 months**, owning the full cycle: React user dashboard for paid tasks, re-engagement chatbot notifications, and admin verification queues.

SODA — Full-Stack Engineer

Aug 2022 – Oct 2023 • 1 yr 3 mos • Remote

Lead-generation agency for residential developers and law firms (~60 employees). Owned client-server architecture, APIs, and databases.

- Decomposed a legacy PHP monolith into containerized **Node.js/TypeScript microservices** (Express, PostgreSQL), migrating core business logic and establishing isolated services and Web APIs.
- **Tripled monthly channel revenue from ~\$47K to ~\$141K** and slashed lead response time from ~8 min to **under 30 s** by leading an automated AI processing assistant with real-time customer communication.
- Lifted conversion ~**1.5x** on high-traffic SPA web applications by raising Lighthouse Performance from **58 to 87** through Core Web Vitals optimization, asset loading, and layout stability.

OPEN-SOURCE PROJECT

vk-ai-bot-platform (MIT) — multi-tenant AI chatbot platform: OpenRouter LLM API, token-aware context windows, multi-step re-engagement on BullMQ, event deduplication, PostgreSQL, Redis, React, Docker Compose, GitHub Actions.

SKILLS

Languages & Web Stack: TypeScript, JavaScript (ES6+), HTML5, CSS3, Node.js, SQL, React, Next.js, Redux Toolkit

Architecture & Web APIs: REST Web APIs, Web API design, microservices architecture, GraphQL, WebSocket, distributed systems, system design, domain-driven design, OWASP Top 10

Databases & Data Systems: Relational databases, SQL, PostgreSQL (query and index optimization, profiling, performance tuning), Redis, Apache Kafka, BullMQ

Cloud, CI/CD & Tooling: Docker, Kubernetes, AWS, GitLab CI/CD, GitHub Actions, Git (code reviews, collaborative workflows), OpenTelemetry, Grafana, JIRA

Process & Leadership: Technical mentorship, code review, requirements decomposition, unit testing (Jest, Vitest, Supertest), Playwright (E2E), Agile/Scrum, technical writing

AI-Assisted Engineering: Claude Code (project conventions, guardrails), MCP (Model Context Protocol) custom servers, AI-assisted development workflows, model cascading

EDUCATION & LANGUAGES

Southern Federal University — Applied Informatics, 2022–2024

English — professional working proficiency (daily in a distributed team) • Russian — native
