SUMMARY

Senior Full-Stack Engineer with 4+ years shipping revenue-critical products in fintech and marketing tech on TypeScript, Node.js (NestJS) and React. Led a 3-engineer team to launch a credit-report product that turned profitable in its first week (+40% net profit); built an AI lead-processing channel that tripled monthly revenue to ~\$141K. Owns features end to end: data model, API, UI, CI/CD, observability.

EXPERIENCE

Alfa-Dengi (Alfa-Bank ecosystem) via GIDFINANCE — Senior Full-Stack Engineer • Tech Lead

Sep 2024 – Present • 2 yrs • Remote

Consumer lending product in the ecosystem of one of Russia's largest private banks; delivered via outsourcing partner GIDFINANCE.

Cross-functional product team; I ship e2e features from the backend to the interface.

- Launched a credit-report product that **turned profitable in its first week** (net profit +40%, EPC doubled from ~\$1.9 to ~\$3.8) by leading a 3-engineer team through technical design, user flows, the API contract, the NBKI credit-bureau integration and a Node.js backend querying a **6M-row** scoring dataset.
- Enabled marketers to launch automated push campaigns **with zero engineering involvement** (~\$80K/month generated) by building a status-driven campaign builder on NestJS and React.
- Cut load time of a 100K-row lead-scoring table (9K+ new leads/day) from **8 s to under 1 s** by reworking the data-access path: server-side pagination, PostgreSQL query and index optimisation, caching.
- Eliminated notification loss** under peak load by moving notification delivery and domain-event processing to **Apache Kafka**.
- Introduced AI-agent workflows across the engineering team: built **custom MCP servers** over the codebase and internal APIs, integrated Claude into daily development and ran hands-on training on agentic workflows and AI code review.

Appbooster — Full-Stack Engineer (contract)

Nov 2023 – Aug 2024 • 10 mos • Remote

Mobile-app marketing platform: ~100 employees, 10,000+ apps promoted for clients in 26 countries.

- Grew the task-and-rewards product to **1,000 daily active users in 3 months** by owning the full cycle: React user dashboard for paid tasks and proof submission, chatbot re-engagement notifications and the admin verification queue.
- Made **100% of payouts auditable** and screened out duplicate and faked proofs by modelling the full task lifecycle from pick-up to payout behind a moderation queue with anti-fraud rules, processing **hundreds of completions a day**.
- Enabled paid channels to be judged by **retained active users instead of installs** by shipping UTM and referrer attribution alongside activity and return-rate metrics.

SODA — Full-Stack Engineer

Aug 2022 – Oct 2023 • 1 yr 3 mos • Remote

Lead-generation agency for residential developers and law firms (~60 employees). Owned the client-server side: APIs, database, interfaces.

- Tripled monthly channel revenue from ~\$47K to ~\$141K** and cut lead response time from ~8 min to **under 30 s** by leading the AI lead-processing assistant and running a 3-month controlled comparison (humans / humans + AI / AI only) that moved the channel fully to AI.
- Cut cost per processed lead 10×** by designing an LLM model cascade: a cheap model handles routine leads and escalates to a stronger model only on low confidence.
- Migrated a legacy PHP monolith to **Node.js/TypeScript microservices** (Express, PostgreSQL): service decomposition, business-logic and API migration.
- Lifted conversion **~1.5×** on SPA sites receiving paid ad traffic by raising Lighthouse Performance from **58 to 87** through Core Web Vitals work.

OPEN-SOURCE PROJECT

vk-ai-bot-platform (MIT) — multi-tenant AI chatbot platform: OpenRouter LLM API, per-community prompt versioning, token-aware context windows, multi-step re-engagement workflows on BullMQ, event deduplication, admin analytics. TypeScript, Fastify, Drizzle ORM, PostgreSQL, Redis, React, Docker Compose, GitHub Actions.

SKILLS

Languages: TypeScript, JavaScript (ES6+), Node.js, SQL

Backend: NestJS, Express, Fastify, REST APIs, GraphQL, WebSocket, Prisma ORM, microservices, event-driven architecture (Apache Kafka, BullMQ), domain-driven design, system design

Frontend: React, Next.js, Redux Toolkit, Ant Design, Feature-Sliced Design, Vite, Webpack, Core Web Vitals, Lighthouse

AI Engineering: LLM integration (Anthropic API, OpenAI API, OpenRouter), AI agents, agentic workflows, MCP custom servers, prompt engineering, model cascading/routing, cost/latency optimisation, Claude Code

Data & Infra: PostgreSQL, Redis, Apache Kafka, BullMQ, Docker, Kubernetes, AWS, GitLab CI/CD, GitHub Actions, OpenTelemetry, Grafana

Testing & Process: Playwright (E2E), Vitest, Jest, Supertest, code review, Agile/Scrum, technical documentation, mentoring

EDUCATION & LANGUAGES

Southern Federal University — Applied Informatics, 2022–2024

English — professional working proficiency (daily in a distributed team) • Russian — native
