SUMMARY

Senior Engineering Manager and Frontend Lead with 4+ years building high-load financial web applications and 2 years leading engineering delivery across React and TypeScript. Led a 3-engineer team to design and ship a revenue-critical financial product that turned profitable in its first week (+40% net profit), engineered a visual workflow canvas on React generating ~\$80K/month, and optimized a 100K-row financial data view from 8 s to under 1 s through virtualization and data-access tuning. Drives a data-informed engineering culture and modern developer tooling: authored project conventions for Claude Code, built custom MCP servers, and introduced agentic pre-review workflows that reduced typical module delivery with tests from ~2 h to ~40 min.

EXPERIENCE

Alfa-Dengi via GIDFINANCE — Senior Full-Stack Engineer • Tech Lead Sep 2024 – Present • 2 yrs • Remote
Consumer-lending marketplace with 9K+ new leads a day. Cross-functional product team; contract engagement via GIDFINANCE.

- Led a 3-engineer team through technical design, user flows, API contracts, and an interactive UI for a credit-report product that **turned profitable in its first week** (net profit +40%, EPC doubled from ~\$1.9 to ~\$3.8) over a **6M-row** dataset.
- Drove engineering efficiency and AI adoption across the team: authored **project rules for Claude Code** (architecture conventions, guardrails), built **custom MCP servers** exposing schemas and documentation, and trained the team, cutting module delivery with tests from **~2 h to ~40 min**.
- Engineered a visual drag-and-drop campaign canvas on React and NestJS with normalized Redux state, undo/redo, and live validation, enabling non-technical teams to deploy automated workflows **with zero engineering involvement** (~\$80K/month generated).
- Cut load time of a 100K-row financial scoring table (9K+ new leads/day) from **8 s to under 1 s** by combining query profiling, server-side pagination, and client-side row virtualization in the DOM.
- **Eliminated notification loss** under peak load by moving notification delivery to **Apache Kafka**, streaming real-time status updates and live market-facing events to the React UI over **WebSocket**.

Appbooster — Full-Stack Engineer (contract) Nov 2023 – Aug 2024 • 10 mos • Remote
Mobile-app marketing platform: ~100 employees, 10,000+ apps promoted for clients in 26 countries.

- Grew the task-and-rewards platform to **1,000 daily active users in 3 months** by owning the full frontend lifecycle: React user dashboard with optimistic updates, chatbot notifications, and an administrative moderation queue.
- Made **100% of payouts auditable** and screened out duplicate and faked proofs by modelling the full task lifecycle behind an asynchronous moderation queue with anti-fraud rules, processing **hundreds of completions a day**.

SODA — Full-Stack Engineer Aug 2022 – Oct 2023 • 1 yr 3 mos • Remote
Lead-generation agency for residential developers and law firms (~60 employees). Owned the client-server side: APIs, database, interfaces.

- Lifted conversion **~1.5×** on SPA applications under paid ad traffic by raising Lighthouse Performance from **58 to 87** through Core Web Vitals optimization and bundle tuning.
- **Tripled monthly channel revenue from ~\$47K to ~\$141K** and cut lead response time from ~8 min to **under 30 s** by leading an AI lead-processing assistant and conducting a 3-month controlled comparison (humans / humans + AI / AI only) that moved the channel fully to AI.
- Removed manual lead hand-off by building a modular React integration hub syncing agency CRM systems with external partner platforms.

OPEN-SOURCE PROJECT

vk-ai-bot-platform (MIT) — multi-tenant AI chatbot platform: OpenRouter LLM API, token-aware context windows, multi-step re-engagement workflows on BullMQ, event deduplication, admin analytics. TypeScript, Fastify, Drizzle ORM, PostgreSQL, Redis, React, Docker Compose, GitHub Actions.

SKILLS

Engineering Management & Leadership: Technical leadership, delivery planning for a 3-engineer team, code review, mentoring, engineering efficiency metrics, technical documentation, Agile/Scrum, hands-on team training

Frontend Architecture & Systems: React, TypeScript, Next.js, JavaScript (ES6+), Redux Toolkit, Feature-Sliced Design, modular architecture, design systems, UI kits, Vite, Webpack, Core Web Vitals, Lighthouse

Developer Tools & AI Workflows: Claude Code (project conventions, guardrails), custom MCP servers, agentic pre-review, AI code review, developer tooling automation, Git (collaborative workflows)

Backend, APIs & Real-Time: Node.js, NestJS, Express, Fastify, REST APIs, GraphQL, WebSocket (real-time streaming), microservices, OpenAPI/Swagger, system design

Data & Infrastructure: PostgreSQL (query and index optimisation), Redis, Apache Kafka, BullMQ, Docker, Kubernetes, CI/CD (GitLab CI/CD, GitHub Actions), OpenTelemetry, Grafana

EDUCATION & LANGUAGES

Southern Federal University — Applied Informatics, 2022–2024
English — professional working proficiency (daily in a distributed team) • Russian — native
