SUMMARY

Senior Frontend Developer with 4+ years building production React/TypeScript web applications, data-intensive interfaces, and high-performance UI architectures. Specializes in frontend performance and complex state: cut load time on a 100K-row dataset from 8 s to under 1 s via client virtualization and re-render control, raised Lighthouse Performance from 58 to 87 (+50% conversion), and designed a drag-and-drop visual canvas generating ~\$80K/month. Deep expertise in normalized state, WebSocket real-time updates, component design systems from Figma, and AI-native developer tooling. Ready to relocate to Cyprus.

EXPERIENCE

Alfa-Dengi via GIDFINANCE — Senior Full-Stack Engineer · Tech Lead Sep 2024 – Present · 2 yrs · Remote
Consumer-lending marketplace with 9K+ new leads a day. Cross-functional product team; contract engagement via GIDFINANCE.

- Enabled marketers to launch automated multi-step campaigns **with zero engineering involvement (~\$80K/month generated)** by designing and shipping a visual drag-and-drop campaign canvas on React and NestJS with normalized Redux Toolkit state, live validation, and per-status frequency caps.
- Cut load time of a 100K-row lead-scoring table (9K+ new leads/day) from **8 s to under 1 s** by reworking the data-access path: client-side list virtualization, server-side pagination, and PostgreSQL query and index optimisation.
- Delivered real-time status and notification updates directly to the React UI over **WebSocket** backed by **Apache Kafka** domain events, eliminating message loss under peak traffic bursts.
- Launched a credit-report product that **turned profitable in its first week** (net profit +40%, EPC doubled from ~\$1.9 to ~\$3.8) by leading a 3-engineer team through user flows, technical design, Web API contracts, and responsive UI delivery.
- Made AI coding agents a team-level capability: wrote **project rules for Claude Code** (architecture conventions, style guardrails) and built **custom MCP servers** exposing schemas and documentation, cutting CRUD module delivery from ~2 h to ~40 min.

Appbooster — Full-Stack Engineer (contract) Nov 2023 – Aug 2024 · 10 mos · Remote
Mobile-app marketing platform: ~100 employees, 10,000+ apps promoted for clients in 26 countries.

- Grew the task-and-rewards product to **1,000 daily active users in 3 months** by owning the full frontend cycle: React user dashboard with optimistic updates for paid tasks and proof submission, chatbot re-engagement notifications, and an admin verification queue.
- Made **100% of payouts auditable** and screened out duplicate and faked proofs by modelling the full task lifecycle from pick-up to payout behind a moderation queue with anti-fraud rules, processing **hundreds of completions a day**.

SODA — Full-Stack Engineer Aug 2022 – Oct 2023 · 1 yr 3 mos · Remote
Lead-generation agency for residential developers and law firms (~60 employees). Owned the client-server side: APIs, database, interfaces.

- Lifted conversion ~1.5x on high-traffic SPA web applications by raising Lighthouse Performance from **58 to 87** through Core Web Vitals work, asset loading, layout stability, and re-render profiling.
- Tripled monthly channel revenue from ~\$47K to ~\$141K** and cut lead response time from ~8 min to **under 30 s** by leading an AI lead-processing assistant across a 3-month controlled trial with a real-time chat interface.
- Built an internal **React integration hub** linking the agency's CRM with external partner CRM systems, managing API contracts, data mappings, and bidirectional synchronization across distributed endpoints.

OPEN-SOURCE PROJECT

vk-ai-bot-platform (MIT) — multi-tenant AI chatbot platform: OpenRouter LLM API, per-community prompt versioning, token-aware context windows, multi-step re-engagement workflows on BullMQ, event deduplication, admin analytics. TypeScript, Fastify, Drizzle ORM, PostgreSQL, Redis, React, Docker Compose, GitHub Actions.

SKILLS

Frontend Architecture & Core: React, TypeScript, JavaScript (ES6+), Next.js, Redux Toolkit, state management (normalized state, optimistic updates), component architecture, reusable UI components

Performance & Real-Time: Frontend performance optimization, list virtualization and windowing, re-render control, bundle size optimization, Core Web Vitals, Lighthouse, WebSocket (real-time UI)

Design Systems & UI/UX: Figma to code, design systems, UI components, interaction design, visual workflow canvases, responsive layout, modern CSS, accessibility (a11y)

Backend & Data: Node.js, NestJS, Express, REST APIs, GraphQL, PostgreSQL (query and index optimization), Redis, Apache Kafka, BullMQ

DevOps & AI Tooling: Vite, Webpack, Docker, Kubernetes, AWS, GitLab CI/CD, GitHub Actions, Claude Code, MCP (Model Context Protocol) custom servers

Testing & Process: Vitest, Jest, Playwright (E2E), code review, Agile/Scrum, technical documentation, mentoring

EDUCATION & LANGUAGES

Southern Federal University — Applied Informatics, 2022–2024
English — professional working proficiency (daily in a distributed team) · Russian — native
