SUMMARY

Senior Product Manager with 4+ years driving customer-facing product growth, user acquisition, and monetization across fintech and marketing platforms. Led the discovery and delivery of a consumer credit-report product, cutting scope to a minimal testable flow that turned profitable in its first week (+40% net profit, EPC doubled from ~\$1.9 to ~\$3.8) before scaling across two more brands via A/B experimentation. Combines rigorous data-driven discovery with deep technical and UX acumen: designed an internal visual campaign builder generating ~\$80K/month, grew an interactive engagement platform to 1,000 DAU in 3 months with retention attribution, and led a 3-month controlled experiment that tripled revenue from ~\$47K to ~\$141K/month.

EXPERIENCE

Alfa-Dengi via GIDFINANCE — Senior Full-Stack Engineer • Tech Lead

Sep 2024 – Present • 2 yrs • Remote

Consumer-lending marketplace with 9K+ new leads a day. Cross-functional product team; contract engagement via GIDFINANCE.

- Led product discovery, user flows, and delivery for a credit-report product that **turned profitable in its first week** (net profit +40%, EPC doubled from ~\$1.9 to ~\$3.8) by cutting scope to the minimum testable funnel and rolling out to two more brands after **A/B tests**.
- Delivered an automated push-campaign builder that generated **~\$80K/month** in incremental revenue, partnering with marketing to build a status-driven workflow canvas that marketers operate **with zero engineering involvement**.
- Reduced query latency on a 100K-row lead-scoring dataset (9K+ new leads/day) from **8 s to under 1 s**, eliminating user drop-offs during operational verification workflows.
- Drove engineering efficiency and product velocity: authored **project rules for Claude Code** and built **custom MCP servers**, cutting typical feature cycle delivery from **~2 h to ~40 min**.
- **Eliminated notification loss** under peak traffic bursts by moving domain events to **Apache Kafka**, with real-time application updates streamed to users over **WebSocket**.

Appbooster — Full-Stack Engineer (contract)

Nov 2023 – Aug 2024 • 10 mos • Remote

Mobile-app marketing platform: ~100 employees, 10,000+ apps promoted for clients in 26 countries.

- Shifted paid acquisition evaluation **from raw installs to retained active users** by implementing UTM and referrer attribution alongside return-rate and behavioral engagement metrics.
- Grew a gamified task-and-rewards product to **1,000 daily active users in 3 months** by owning product discovery, user onboarding flows, proof verification, and automated re-engagement triggers.
- Made **100% of payouts auditable** and screened out duplicate and faked proofs by modelling the full task lifecycle behind a moderation queue with anti-fraud rules, processing **hundreds of completions a day**.

SODA — Full-Stack Engineer

Aug 2022 – Oct 2023 • 1 yr 3 mos • Remote

Lead-generation agency for residential developers and law firms (~60 employees). Owned the client-server side: APIs, database, interfaces.

- **Tripled monthly channel revenue from ~\$47K to ~\$141K** and cut lead response time from ~8 min to **under 30 s** by leading an AI assistant initiative through a 3-month controlled experiment (humans / humans + AI / AI only) that proved full automation superiority.
- Lifted conversion **~1.5×** across ad-driven landing funnels by raising Lighthouse Performance from **58 to 87** through Core Web Vitals and UX optimization.
- **Cut cost per processed lead 10×** by designing a confidence-based model cascade, balancing response quality with operational unit margins.

OPEN-SOURCE PROJECT

vk-ai-bot-platform (MIT) — multi-tenant AI chatbot platform: OpenRouter LLM API, token-aware context windows, multi-step re-engagement workflows on BullMQ, event deduplication, admin analytics. TypeScript, Fastify, Drizzle ORM, PostgreSQL, Redis, React, Docker Compose, GitHub Actions.

SKILLS

Product Strategy & Management: Product discovery, roadmap planning, user acquisition, retention and engagement, hypothesis validation, A/B testing, MVP scoping, product analytics, unit economics

Data, Analytics & Experimentation: PostgreSQL, SQL, cohort analysis, UTM and referrer attribution, Core Web Vitals, Lighthouse, performance metrics, conversion funnels, A/B experimentation

UX, Design & Technical Acumen: User flows, wireframing, API contracts, system architecture, microservices, WebSocket (real-time data), React, TypeScript, Node.js, OWASP Top 10

AI Product Innovations: AI assistants, LLM integration (Anthropic, OpenAI, OpenRouter), prompt engineering, model cascades, custom MCP servers, AI-assisted workflows, Claude Code

Leadership & Collaboration: Cross-functional leadership (engineering, design, marketing), Agile/Scrum, backlog prioritization, stakeholder management, technical documentation

EDUCATION & LANGUAGES

Southern Federal University — Applied Informatics, 2022–2024

English — professional working proficiency (daily in a distributed team) • Russian — native
